# HRS ICO – TOKEN & REWARD DISTRIBUTION MODEL

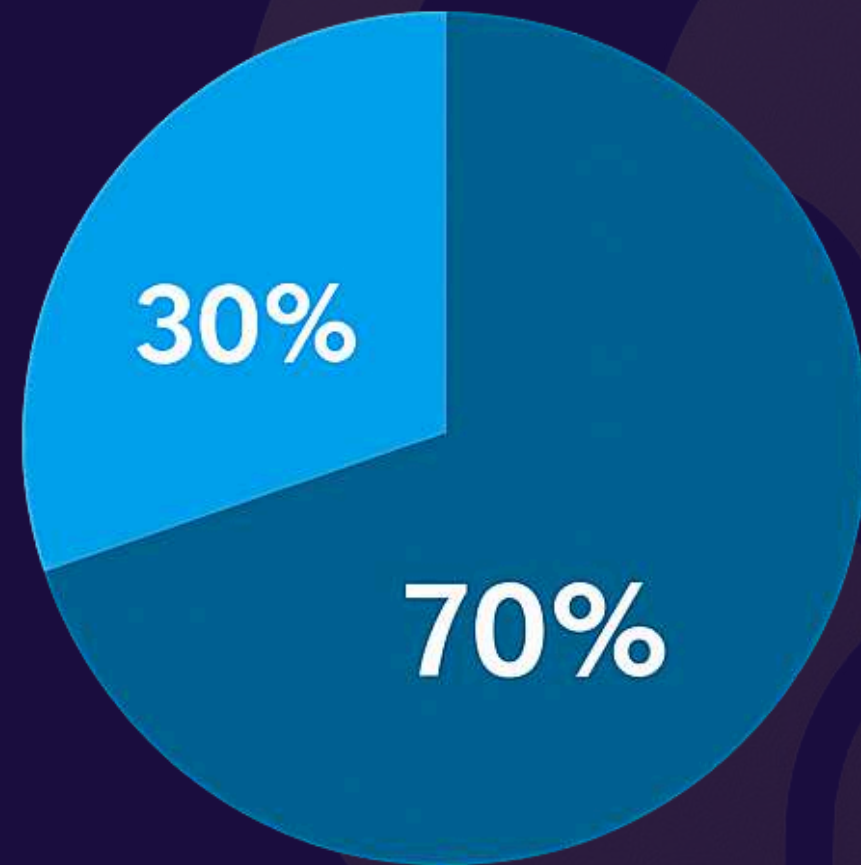

## Buyer Token Allocation & USDT Distribution from ICO Purchase

During the ICO, buyers receive **100% of the HRS tokens** they purchase. However, **50% of their USDT** payment is instantly distributed across the **referral network** as rewards, while the remaining **50% backs the token's liquidity**.

### Buyer Token Allocation

30% → Instantly credited to the buyer's wallet.

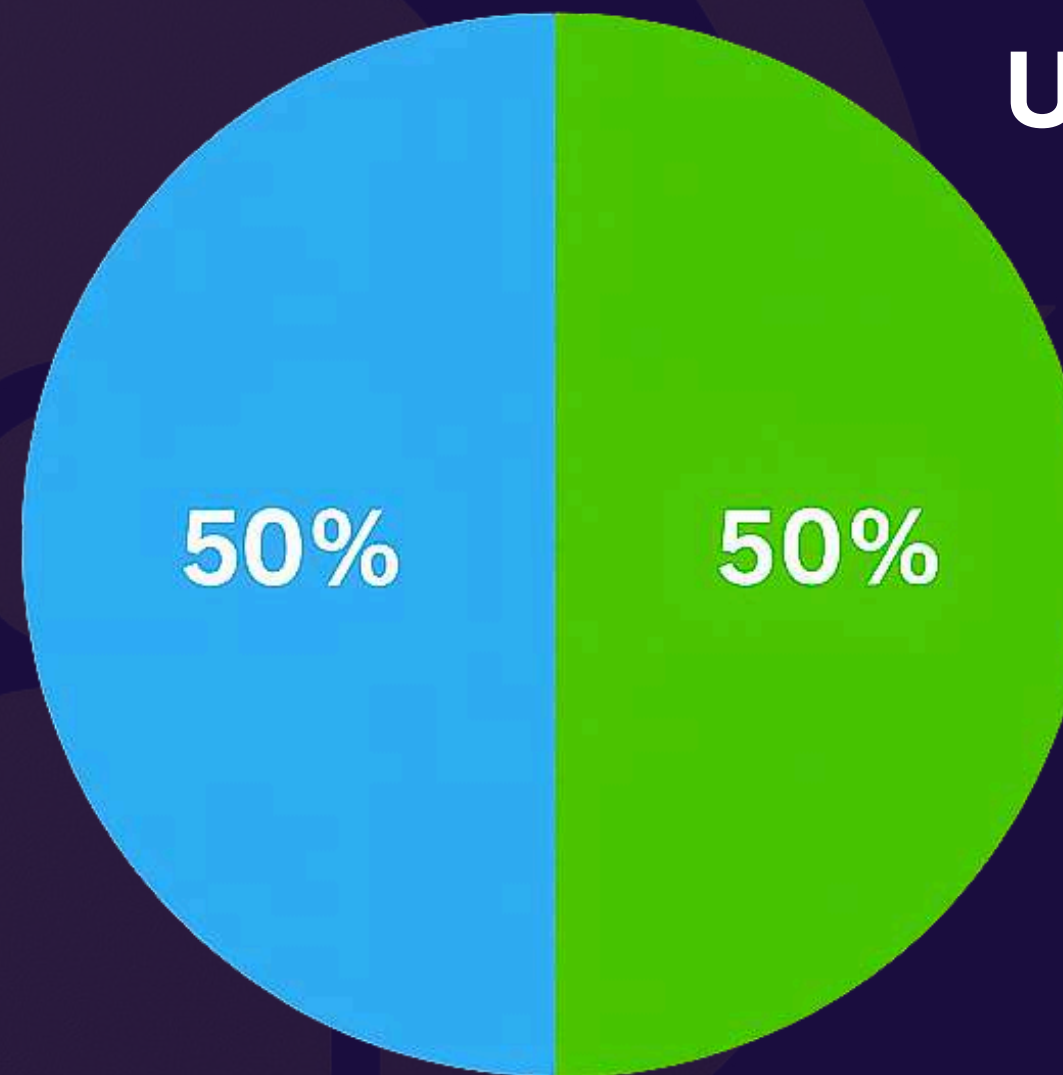

70% → Locked under a vesting schedule and released daily **at 0.50% per day** until all tokens are fully claimed.

### USDT Allocation

■ Allocated directly to the buyer

■ Distributed across the referral network

## ICO PURCHASE LIMITS (BASED ON MATRIX PACKAGE)

SR. NO / SLOT NAME	RANK PRICE	MAX TOKEN PURCHASE ALLOWED
1. EXPLORER	\$5 wBNB	\$50
2. BUILDER	\$10 wBNB	\$100
3. STRATEGIST	\$20 wBNB	\$200
4. INNOVATOR	\$40 wBNB	\$400

Generation Income Structure

## ICO INCOME QUALIFICATION RULES

To unlock income from each generation :

GENERATION /LEVEL	REWARD (USDT-\$)	DIRECT REFERRAL REQUIRED TO UNLOCK
Level- 1	5%	1 Direct Required of 4 Web3X Packs
Level-2	5%	2 Direct Required of 4 Web3X Packs
Level-3	5%	3 Direct Required of 4 Web3X Packs
Level-4	5%	4 Direct Required of 4 Web3X Packs
Level-5	5%	5 Direct Required of 4 Web3X Packs
Level-6	5%	6 Direct Required of 4 Web3X Packs
Level-7	5%	7 Direct Required of 4 Web3X Packs
Level-8	5%	8 Direct Required of 4 Web3X Packs
Level-9	5%	9 Direct Required of 4 Web3X Packs
Level-10	5% HRS (System)	-

If the condition is **not met**, income passes to the next qualified upline.

The distribution extends across **9 generations**, where **each upline receives 5%** of the **buyer's USDT** payment.

Additionally, the **System Operational Pool** earns rewards from the **10th generation through a holding** mechanism. Since it has **no reserved HRS token allocation**, tokens are generated **only when new purchases occur within the system**.

The System Operational Pool **Earns 5% in HRS tokens** from each buyer's purchase attributed to the **10th generation**.

## TOKEN BURNING MECHANISM

All referral rewards are paid in USDT. To maintain ecosystem balance, an equivalent value of HRS tokens is permanently burned, resulting in reduced circulating supply, long-term value growth, and a sustainable ecosystem.

## BUYER AND REFERRAL DISTRIBUTION

## STAKING TIERS & REWARD SYSTEM

### STAKING / MINING (30% SUPPLY)

VESTING PERIOD	MINIMUM HORSE TOKEN	BASE APY	BONUS & CONDITION	TOTAL MAX APY
Flexible	10 HRS	10%	-	10%
30 Days	25 HRS	20%	+5% if Tier-6	25%
90 Days	50 HRS	40%	+10% if Slot-6	50%
180 Days	100 HRS	70%	+15% if Slot-10	85%
365 Days	200 HRS	100%	+20% if Slot -12	120%

Earn APY on locked Horse (HRS) tokens. Bonuses apply based on **Web3X Matrix** participation.

## BURNING MECHANISM & LIQUIDITY STRATEGY

Burned through Airdrop, ICO, Swapping and Upcoming Ecosystem Projects

Each ICO phase automatically adds liquidity based on new token prices.

## ANTI-DUMPING & SUSTAINABILITY

- \* 90% supply burned = high scarcity
- \* **Staking & Matrix lock** structure encourages **holding & prevent dumping**
- \* Auto-liquidity injection on **every registration and ICO buying** stabilize price
- \* **Generation income through referral** rewards motivates organic network growth
- \* **NFT tiers + Matrix bonuses** = deeper engagement **(long-term participation)**
- \* **Attractive ICO price** curve encouraging early action
